

Introduction

This guide provides setup up instructions for the CRD5500-1000XR cradle for use with the MC55 and MC65. The CRD5500-1000XR cradle provides connection to a host computer using USB, a dial-up network using the modem or an Ethernet network.

The CRD5500-1000XR contains:

- cradle
- Ethernet cable
- telephone cable.

Required Software

Download the *USB Modem Driver and Update Loader Image Keyboard Micro Firmware for MC55xx* package from the Motorola Support Central web site: <http://www.motorola.com/enterprisemobility/support>.

MC55 with OEM Version 01.27.0001 and Below

First ensure that the MC55 has Keyboard Firmware version 4.2 or higher. To determine the Keyboard Firmware version, tap **Start > Settings > System > System Info** icon > **HW Version** tab. If the **Kbd FW Ver:** is 4.1 or lower, install the Keyboard Firmware 4.2 upgrade.

Install the Micro USB Modem Driver software.

Following the instructions with the software package to install the software.

MC55 with OEM Version 01.35.001 and Above and MC65 with rev A OEM Version 21

Install the Micro USB Modem Driver software.

Following the instructions with the software package to install the software.

MC65 with A1 OEM Version 30.1 and Above

The Driver is included in the OEM version.

Country Settings

The modem defaults to operation with US telephone networks. To operate the modem with other country telephone networks, it must be configured using an application on the MC55/MC65. Download the *Cradle Modem Country Configurator Application Software for MC55xx* package from the Motorola Support Central web site: <http://www.motorola.com/enterprisemobility/support>.

Following the instructions with the software package to install the application on the MC55/MC65.

The application includes country selections for all supported countries and automatically programs the modem and adjust its operating parameters to comply with the telephone network in the selected country.

Connection Setup

Indicators

Spare Battery Charging LED

This LED indicates the charging status of the spare battery.

Ethernet/Modem LED

This LED blink whenever Ethernet or modem connectivity is established.

Speed LED

The cradle's green Speed LED lights to indicate that the transfer rate is 100 Mbps. When it is not lit it indicates that the transfer rate is 10Mbps.

Link LED

The cradle's yellow Link LED blinks to indicate activity, or stays lit to indicate that a link is established. When it is not lit it indicates there is no link.

MC55/MC65 Software Setup

Ethernet Setup

Tap **Start > Settings > Connections** tab > **Wi-Fi** icon.

Select **Work** from the drop-down menu.

Select **USB/Ethernet Series Adapter** from the list box.

Tap **Ok**.

Tap **Start > Settings > Connections** tab > **Connections** icon.

Tap **Advanced** tab.

Tap **Select Networks** button.

Select **My Work Network** from both drop-down menus.

Tap **Ok**.

Tap the **Tasks** tab.

Select **Edit my proxy server**.

Enable both checkboxes.

Tap **Advanced...** button.

Tap **HTTP** type.

In the **Server** text box, enter the proxy server name.

In the **Port** text box, enter the port number.

In the **User name** text box, enter the user name for the proxy server.

In the **Password** text box, enter the password for the proxy server.

Tap **ok** three times.

Perform a warm boot.

Modem Setup

Tap **Start > Settings > Connections** tab > **Connections** icon.

Tap **Add a new modem connection**.

In the **Enter a name for the connection** text box, enter a name for the connection.

In the **Select a modem** drop-down list, select Modem Cradle on USB.

Tap **Next**.

In the text box, enter the phone number to dial.

Tap **Next**.

In the **User name** text box, enter the user name, if required.

In the **Password** text box, enter the password, if required.

Tap **Finish**.

To test the connection, tap **Start > Programs > Internet Explorer**. Enter a web address.

Operation

NOTE

The CRD5500-1000XR does not support hot swapping between operational modes. After moving the switch into a different position, remove the MC55 from the cradle and then re-insert into the cradle.

Ethernet Connection

Place the Connection switch on the bottom of the cradle to the Ethernet position.

Place the MC55/MC65 into the cradle.

To test the connection, tap **Start > Programs > Internet Explorer**. Enter a web address.

Modem Connection

Place the Connection switch on the bottom of the cradle to the Modem position.

Place the MC55/MC65 into the cradle.

The MC55 dials the phone number and connects to the web site.

Regulatory Information

This device is approved under the Symbol Technologies brand: Symbol Technologies, Inc., is the Enterprise Mobility business of Motorola, Inc. ("Motorola").

This guide applies to Model Number CRD5500-1000XR.

All Motorola/Symbol devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required.

Local language translations are available at the following website: <http://support.symbol.com>

Any changes or modifications to Motorola/Symbol Technologies equipment, not expressly approved by Motorola/Symbol Technologies, could void the user's authority to operate the equipment.

For use only with Motorola/Symbol approved and UL Listed mobile computers. Symbol approved and UL Listed accessories and/or Motorola/Symbol approved and UL Listed/Recognized battery packs.

Power Supply

Use only a Motorola/Symbol approved power supply output rated at _12_Vdc and minimum _3.33_A. The power supply shall be Listed to UL/CSA 60950-1; and certified

to IEC60950-1 and EN60950-1 with SELV outputs. Use of alternative power supply will invalidate any approval given to this device and may be dangerous.

Radio Frequency Interference Requirements- FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

Radio Frequency Interference Requirements- Canada

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Marking and European Economic Area (EEA)

Statement of Compliance

Motorola/Symbol hereby declares that this device is in compliance with all the applicable Directives, 2004/108/EC and 2006/95/EC. A Declaration of Conformity may be obtained from <http://www2.symbol.com/doc/>.

TURKISH WEEE Statement of Compliance for All devices

EEE Yönetmeliğine Uygundur Complies with EEE

Motorola reserves the right to make changes to any product to improve reliability, function, or design.

Motorola does not assume any product liability arising out of, or in connection with, the application or use of any product, circuit, or application described herein.

No license is granted, either expressly or by implication, estoppel, or otherwise under any patent right or patent, covering or relating to any combination, system, apparatus, machine, material, method, or process in which Motorola products might be used. An implied license exists only for equipment, circuits, and subsystems contained in Motorola products.

Warranty

For the complete Motorola hardware product warranty statement, go to: <http://www.motorola.com/enterprisemobility/warranty>.

Service Information

If you have a problem using the equipment, contact your facility's Technical or Systems Support. If there is a problem with the equipment, they will contact the Motorola Enterprise Mobility Support at: <http://www.motorola.com/enterprisemobility/contactsupport>.

Telecom Approval Warnings and Notices

Connecting to the Telephone Network

A compliant telephone lead is required with RJ11 plug (line is on middle pair) for connection to modem, terminated with an appropriate and correctly wired local telecom connector compatible with the telephone network. Such a cable may be sourced from your local supplier. Alternatively, compliant RJ11 plug to RJ11 plug cables may be used with a range of adapters for places such as Europe.

CAUTION: To reduce risk of fire, use only No. 26 AWG or larger telecommunication line cord.

User and Service Access — No user service is intended and no part of the modem, other than the line connection plug, is accessible to users.

United States

Note: Due to a change in Regulations, different text is required for products FCC certified prior to July 23 2001 and newly approved products going forward under ACTA. New Products (followed by "Common to both existing and New Products" below) Where this device contains a Motorola/Symbol internal modem, this equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. A Supplier's Declaration of Conformity for the modem type may be obtained from <http://www2.symbol.com/doc/>. On the exterior of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company.

This equipment must be connected to the telephone network or premises wiring using a compatible modular jack (RJ11C) compliant with the applicable FCC Part 68 rules and requirements adopted by ACTA. A compliant telephone cord and modular plug must be used.

This equipment must not be used on party lines.

If your premises has specially wired alarm equipment connected to the telephone line, ensure the installation of this modem does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Should you experience trouble with this equipment, please contact your facility's Technical or Systems Support first who will contact your nearest Motorola/Symbol Customer Service Center. If necessary, the Motorola/Symbol Support Centre may be contacted at: 1-800-653-5350 If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

If the modem causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the modem. If this happens the telephone company will provide advance notice so you may make any necessary modifications to maintain uninterrupted service.

Canada

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation "IC:" before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

The Ringer Equivalence Number (REN) for this terminal equipment is 0.2 The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

The European Economic Area (EEA)

Statement of Compliance for Modems

Motorola/Symbol hereby declares that this device is in compliance with the essential requirements and other relevant provisions of Directives 1999/5/EC. Declaration of Conformities may be obtained from <http://www2.symbol.com/doc/> The modem is designed to interwork with the Public Switched Telephone Networks within the EEA and listed on the Declaration of Conformity.

Waste Electrical and Electronic Equipment (WEEE)

English: For EU Customers: All products at the end of their life must be returned to Motorola for recycling. For information on how to return product, please go to: <http://www.motorola.com/recycle/weee>.
